Professional Summary

Computer Science and Engineering student with a strong foundation in Python, Java, C, SQL, and Object-Oriented Programming. Interested in software development, problem-solving, and machine learning. Seeking an entry-level software engineering opportunity to apply technical skills, develop practical solutions, and contribute to organizational goals.

Technical Skills

Programming Languages: Python, SQL
Tools: GitHub
Other Technical Skills: VS Code

Education

B.Tech — Computer Science and Engineering
VEMU INSTITUTE OF TECHNOLOGY
Percentage: 77%
2024 – 2027
Diploma - ECE
Percentage: 69%
2020 – 2023
SSC
GOVERNMENT HIGH SCHOOL
Percentage: 98%
2019 – 2020

Projects

- Mini AI Chatbot HTML, CSS, JavaScript, Python, Gemini API •Developed a web-based AI chatbot with an interactive user interface using HTML, CSS, and JavaScript. •Integrated a Python backend with the Gemini API to process user queries and generate AI-based responses. •Implemented API-based communication between the chatbot interface and the AI model. •Designed a simple and responsive interface for real-time user interaction. Heart Disease Prediction System Python, Machine Learning, Pandas, Flask •Developed a machine learning application to predict the likelihood of heart disease based on patient health parameters. •Performed data preprocessing and exploratory data analysis using Python and Pandas. •Trained and evaluated a classification model for prediction. •Built a Flask-based interface to provide predictions.

Certifications

Machine Learning Using Python — APSSDC
Cloud Computing - NPTEL
